LEVI

Meet Levi!

Levi is a vibrant, fun-loving 6-year-old with a sweet and affectionate personality. He has a joyful spirit and enjoys sharing his enthusiasm with the people around him.

Basketball is one of Levi's favorite activities, and he proudly believes his brother is the best basketball player in the world! When he isn't playing basketball, Levi loves being outside. You might find him riding his bike, digging in the dirt, or enjoying a day at the pool. He also enjoys spending time with other children and currently lives with older youth and children a few years older than him.

Levi is doing very well in school and benefits from consistency, structure, and gentle guidance. Like many children his age, he sometimes needs a quick reminder or redirection to help him refocus, and he responds well to this support. Levi has made wonderful developmental progress and continues to grow and thrive.

Levi was born with a cleft lip and has strabismus, sometimes referred to as lazy eye. These are important parts of Levi's medical history, but they certainly don't define the energetic and engaging little boy he is.

Levi's team is looking for a two-parent family who can provide him with a loving, structured, and supportive home. A family where Levi can be the child with the highest level of needs would be the best fit for him. Levi does well with other children, and there are no identified concerns with pets in the home.

Most importantly, Levi needs a family ready to celebrate his strengths, support him as he grows, and provide the stability and lifelong commitment every child deserves.
